

Business proposal **Stay Ease**

Proposal Content:

If the storyline is fictional, you would still be required to present realistic content for the fictional client.

1. Organization Overview:

Name: [Stay Ease]

Provide a brief history of the organization.

Stay ease is an airbnb type accommodation business started in 2025. The business is aimed at offering cheap accommodation for travelers from overseas as well as local travelers.

Mission statement

Our aim is to provide comfortable and safe housing accommodation for our clients that are traveling.

Vision statement

Our vision is to become one of the best accommodation businesses in the country. We want our business to be known for the best quality, and the utmost safety for our customers

Target audience.

Our target audience is mainly travelers the need a quick and easy solution to their accommodation in the area that they are traveling to

These include:

International travelers

People traveling on business trips

Local travelers that need accommodation for the weekend

People with international travelers h remote job

2. Website Goals and Objectives:

Define specific goals for the website (e.g., increase website traffic, generate leads, sell products, or provide valuable information).

- Goal

The goal of this website is to increase the amount of customers that we get and allow for easier access to our services

- Objectives

We aim to have 100 clients for the financial year

We want our brand awareness to increase

We want to show our variety of units

- Determine and present key performance indicators (KPIs) to measure success.

We will measure how many people use the website

The measure of time spent on the website

The number of bookings on the website

3. Current Website Analysis (if applicable):

Analyse the strengths and weaknesses of the existing website.

- Strengths

Active accommodation presence

Growing interest in company through the website

High demand from local travelers

- Weaknesses

There is a lack of advertisements

There is a lack of a central platform for the customers enquiries

Identify areas for improvement

The website Ui can be more polished

Easier layout to understand

Show better visuals of the units

Look more professional

4. Proposed Website Features and Functionality:

- Homepage

Introduction of business (Stay ease)

Images of the properties that will feature

A button for quick enquires

Past testimonial reviews from customers

- Contact page

Email of the business

Contact info

Google map's location

- About us page

Background of company

Mission and vision

Accommodation page

Properties that are being listed

Images, location and description of properties

Pricing

Facilities provided

Outline essential features (e.g., homepage, contact page, products/services page) and the desired functionality.

5. Design and User Experience: Discuss the overall design aesthetic and branding, highlighting the following:

Colour Scheme: [gold red and white]

Typography:

Headings: Montserrat

Subheadings: Poppins

Body text: Open Sans

- Layout and Design:
 - clear navigation
 - Mobile friendly design
 - Large images of properties
- User experience consideration
 - Simple navigation to understand
 - Clear booking process
 - Easy access to contact information

Develop low fidelity wireframes to visualise the website's layout and information hierarchy.

Homepage

Heading navigation bar, main hero image that includes a welcome message, property listing, service overview section, customer testimonials

Accommodation page

Header of property listing in grid format amenities, enquiry button on the footer

Contact page

Contact form, google map's locations, phone and email details

6. Technical Requirements:

Identify hosting and domain name requirements and programming languages and frameworks (e.g., HTML, CSS, JavaScript).

Domain example www.stayease.co.za

Good storage

Safe ssl certificate

The website should be usable almost all the time

The website will be used html and/or CSS and/or JavaScript

7. Timeline and Milestones:

Create a realistic project timeline with key milestones that follow the timeline during the subject's submission dates

- Week 1 submission of proposal
- Week 2 wireframe completion
- Week 3 development of the homepage
- Week 4 development of the second page
- Week 5 testing
- Week 6 website submission

8. Budget: Estimate the budget for development, hosting, and maintenance (while this is a series of assignments; the budget should reflect realistic amounts based on your research)

150 rand yearly for the domain

Hosting 1200 rand per year

Development of website 4000 rand

Maintenance 600

Estimated total 5750 rand

9. References:

References listed here are unique to the chosen organization and the researched documentation of the Website Project Proposal. The references listed in this document and the general references used to complete Part 1 will be compiled in the README.md document in the repository for the entire PoE.
